

This Travel Coffee Cup Gift Card Holder is so cute and easy to make - and you can make one for any occasion...

Using different patterned papers you can a simple thank you (like mine below) or use Holiday papers to theme it for Halloween, Thanksgiving, Christmas...Valentines, Easter, Teacher Appreciation...birthdays...any event!

To make your Coffee Cup Gift Card Holder:

Cut a piece of cardstock to be 11" x 4" and score in the center at 5 1/2"...

Fold in half facing towards you.

Measure down from the left top edge (score line) 1/2" and make a pencil mark - repeat for the other side.

Measure in from the left bottom edge by 1/2" and make a pencil mark - repeat for the right side - join those lines like so...

And using your Paper Trimmer, cut along those diagonal lines - and this is what you will have.

Isn't that easy? I love how simple & quick these cards are to make!

To make the top trim take a piece of White cardstock and cut it to be 1 1/2" x 4 1/4" and using a Corner Rounding Punch shape the top two corners.

Place into your score tool or Paper Trimmer with score blade inserted – with the shortest side along the top edge of your trimmer – and score a line down at 1/4" in from the edge with square corners - and this is what you will have...

And the bare bones of your card are complete and ready for assembly!

Next is the fun bit - you get to decorate your card however you wish!

First cut a piece of patterned paper to fit the front of your card - I place a piece of DSP on my desk and lay the card shape on top of it - I leave about 1/2" at the bottom and then draw pencil lines onto the DSP following the shape of the card - I then trim along these lines and this will give you a perfect shape to adhere to your card base...

Then you simply use Dimensionals to attach your white 'lid' and add your belly band.

Belly Band:

Simply take your belly band and open it out - place your card base on top of it and position where you want your belly band to be - using a pencil, gently draw down each side so that you are marking the belly band - and then cut along those lines.

You can do this and then use that as a template to cut a piece of colored cardstock or DSP if you would prefer.

I attached mine to the card using just a length of Sticky Strip along the bottom edge - I didn't need to tape along the side edges because my gift card stayed snugly in there without me doing that - but of course you can always tape down those edges if you want to.

Pop your gift card in however you like it to be - my top photo shows it sticking out but you can also put it in so that it is horizontal if you prefer, like this...

I hope you enjoy making this Gift Card Holder as much as I enjoyed making & designing it – please contact me if you have any questions and I will be very happy to help.
