### **Stampin' Up! Supplies Used:**

- Cardstock: (CS) Night Of Navy, Real Red, Whisper White, Silver Glimmer Paper
- Accessories: Scrap of Ribbon
- Tools: Paper Trimmer, Simple Score Tool, Big Shot, (retired Star Framelits), Tear Tape
- Miscellaneous: Glue Gun, Glue Sticks, Piece of cardboard about 6" to 7" square, Empty Ribbon Spool, Empty Paper Towel Roll, Sparklers, Wire Cutters

INSTRUCTIONS:

1. Cut (18) 4" x 4" Night Of Navy Squares, (18) 4" x 4" Whisper White Squares, & (18) 3" x 3" Real Red Squares.

2. Cut a Cardboard Circle of about 6 1/2" in diameter. (Does not have to be a perfect circle.)

3. Starting with the Night Of Navy CS make a cone shape by rolling one point over the opposite point and adhering together with hot glue. (I found it helped to roll the CS on the edge of the table to help soften it.) Continue to make cones with all of the squares.

4. Lay the Night Of Navy cones down on the cardboard circle in an outer layer. Hot glue in place. (As you can see I had to move and adjust mine and glue some again.) No worries it won't show. Next hot glue the white layer of cones. (If I were doing it again I would move them done a bit so more Navy would show.) Also it may help to do every other one and then go back and fill in. You may use more or you may use less cones. Each wreath will be different.

5. Next glue the Red layer as shown in picture. The bottoms of the Red cones will not touch the cardboard.

6. Cut (2) pieces of Whisper White CS at 2 1/2" x 11". Score at 1/2" intervals ending with 10 1/2" using the Simply Score Board. Adhere the ends together with Tear Tape overlapping the ends, making it into a paper Rosette.

7. Pull one of the sides of an empty Ribbon Spool off the spool. Also cut an empty paper towel roll down to about 2 1/2" long. (Length may vary per wreath.)

8. Hot glue the White paper rosette to the empty ribbon spool side. Then glue the cardboard tube to the ribbon cardboard piece.

9. Glue this piece to the middle of your wreath. Hot glue a scrap of ribbon to the top part of the cardboard back. (optional)

10. Cut sparklers into lengths of about 3" to 3 1/2" (length may vary) and hot glue to the valleys of the Rosette. (Making every other one longer is a great option.)

11. Using the Big Shot and (Retired) Star Framelits and Silver Glimmer Paper cut out a 3" star. On the back side score from each point to the middle of the star using the Simply Score Board. Fold the creases to make the star pop up a little.

12. Hot glue the star to the middle of the Rosette on the wreath and your wreath is complete! Another version without the sparklers is shown also.
